Genomic Medicine in the Mediterranean

During the past years, it has become apparent that the pace of progress in genetic medicine is outpacing the progress in our conversation of how to handle the data and its interpretation, in terms of both discovery and clinical context. Further, it is important that the new technologies and thoughts are disseminated across the globe and that participants from a variety of sociopolitical backgrounds have the opportunity to shape the field.

With those mandates in mind, we intend to initiate a series of conferences in the southern mediterranean to discuss advances in medical genomics in a relatively intimate setting. The first of these is scheduled for the 2nd-5th of October, 2013 in the island of Crete.

REGISTRATION DEADLINE: MAY 1, 2013

ABSTRACT DEADLINE: MAY 1, 2013

Organizers

Emmanouil Dermitzakis, University of Geneva

Nicholas Katsanis, Duke University

Tayfun Özçelik, Bilkent University

Invited Speakers

Fowzan Alkuraya, King Saud University

Stylianos Antonarakis, University of Geneva

Philip Beales, UCL

Han Brunner, Radboud University Nijmegen

Aravinda Chakravarti, Johns Hopkins

Panos Deloukas, Sanger Institute

Richard Gibbs, Baylor

Chris Gunter, Science communicator/Former Nature editor

Manolis Kellis, MIT

André Megarbane, L'Institut Jérôme Lejeune

Joseph Nadeau, Institute for Systems Biology, Seattle

Peristera Paschou, Democritus University of Thrace
